J & A Oben Foundation Opens Office in Kaele, Far North Region of Cameroon

On Monday March 14, 2022 the J & A Oben Foundation opened a new office in Kaele, Mayo Kani Division of the Far North Region of Cameroon. This marked a key and important step towards extending the Foundation's vision of building a better world for all, where social status is not an obstacle to good nutrition, well-being, and longevity.

The office went functional during the Foundation's official launch of the 'Operational Research on Community Mobilization for Routine Vitamin A Supplementation (VAS) of 6 to 59 months old children in the Far North Region of Cameroon' sponsored by Helen Keller International (HKI).

The new office will serve as the base for the ongoing VAS project, as well as be the Foundation's office to oversee humanitarian and nutrition research-based projects in the three Northern Regions of Cameroon.
